

AHMEDABAD

Environmental health assessment indicates critical risk due to elevated PM2.5 concentrations (181.0 ug/m3) and observed warming patterns (+0.51 deg C).

PRIMARY THREATS

STRATEGIC INTERVENTIONS

- P1

Emissions Control — Impact: CRITICAL

Implement alternate-day vehicle rotation and strictly enforce industrial emission caps in peri-urban zones.
- P2

Urban Heat Mitigation — Impact: HIGH

Deploy reflective white-roof coatings at scale and integrate 15% more green canopy in commercial districts.
